OBJECTIVE

I am looking for a full stack Web Development position where I can use my proficiency in Javascript and CSS to help create dynamic and appealing web applications.

SUMMARY OF QUALIFICATIONS

Although I have had a lot of work in management I am looking to change careers for one in Web Development. Since December of 2018, I have been learning programming languages and practicing my coding skills. I used online programs to learn how to code before taking a Bootcamp with the University of Texas. Some key qualifications I offer are :

- Especially skilled at creating dynamic web pages and applications
- Able to work on both front end and back end applications
- Expertise in Javascript, Jquery, and Node.js
