OBJECTIVE

I am looking for a full stack Web Development position where I can use my coding skills and knowledge to help create dynamic and appealing web applications.

SUMMARY OF QUALIFICATIONS

Although I have had a lot of work in management, I am looking to change careers for one in Web Development. I have been learning how to be a full-stack web developer through the University of Texas. Some key qualifications I offer are :

- Especially skilled at creating dynamic web pages and applications
- Expertise with Javascript, JQuery, Sequelize, Express, and Node.js to create backend server side applications
- Proficient in using Bootstrap and CSS to design appealing web pages
- Able to work with and build React applications
- Knowledgeable on working with databases with both MySQL and MongoDB

WORK EXPERIENCE

Tiff's Treats, Round Rock TX   Nov 2016 - Present
Store Manager, Assistant Manager, Driver
- Ran the daily operations of a cookie delivery service
- Responsible for making sure customer orders were fulfilled correctly and on time
- Used Slacked to communicate throughout the company
- Used Asana to keep track of daily, weekly, and monthly tasks
- Trained new employees and made sure they were viable candidates to work for the company
- Made sure store was properly staffed and had the right amount of inventory
- Created weekly schedules for staff
- Increased total yearly sales by 17%

Sodexo at Canobie Lake Park, Salem NH   May 2008 - Oct 2016
Operations Supervisor

- Created, fixed, and enforced workplace policies
- Made sure food locations were fully stocked and staffed for daily operations
- Trained new employees and developed potential leadership candidates for the company
- Resolved any problems or issues from unsatisfied customers
- Hired new employees and helped with their onboarding process
